

FIRST ANNUAL NATURAL RESOURCES

ENVIRONMENTAL DAY

**TUESDAY
AUGUST 6, 2019
10AM to 2PM**

**IOWA TRIBE CHENA BUILDING
4 MILES SOUTH OF PERKINS ON HWY 177**

Join the ITO Office of Environmental Services for the first annual Natural Resources / Environmental Day. This is an event with multiple guests who will share information and fun activities. All ages are welcome and encouraged to come out for this first annual Natural Resources and Environmental Day. We will provide a bag lunch with a sandwich and water.

The ITO OES will use the EnviroScape Model to demonstrate how rain carries pollutants to our creeks and lakes. There will also be information on other environmental and natural resources issues. Lake McMurtry and Friends will be here to provide information on family fun activities available at Lake McMurtry. The Euchee Butterfly Farm is bringing valuable information about the importance of pollinators. You will learn what we can do to increase the butterfly population that is important for pollinating our crops. We are especially excited to have the Deep Fork Wildlife Refuge come with a trailer full of animal pelts, skins and skulls to share and demonstrate our wildlife relations. And from ITO, the equine barn will be here to share information about our horses. And lastly, the Grey Snow Eagle House will be here to share information about the aviary.

Please join Yvette Wiley and Candace Richardson for the first annual Natural Resource and Environmental Day.
